GENERAL OPERATING LICENCE

according to § 22 in combination with § 20 of the Federal German Road Traffic Licencing Regulations (StVZO) as amended on September 28, 1988 (Federal Law Gazette I, page 1793)

Number of the General Operating Licence: 91172

Equipment : Additional control unit for operation on ethanol

Type: T-EC'

Holder of the General Operating Licence and manufacturer: Original LU-9911

This licence is granted for the above-mentioned equipment produced or to be produced in series subject to the following proviso:

The approved equipment is given the type designation

KB A 91172

The official type designation as shown above has to be permanently attached to each equipment to be produced in such a way that it is easy to read from the outside at any time. Markings which might cause confusion with other official type designations must not be attached.

Number of the General Operating Licence:

The additional control equipment for operation on ethanol type T-EC² with version designations t-ecM, t-ecM) and t-ec²-8 must only be offered for installation in vehicles listed in the attached approval documents and observing the stated requirements.

The purchasers have to be informed about the restricted field of use by means of the installation instructions to be included in the delivery of the equipment. In addition to this, the purchasers have to be informed that the Approval Certificate Part I as well as the Approval Certificate Part II need to be immediately submitted to the licensing authority (§ 13 Motor Vehicle Registration Ordinance) so that the type of fuel can be corrected (and, if suggested under 4.1 of the test report for the type of vehicle, the rated rpm can be corrected).

For installation, these installation instructions have to be observed.

Each equipment has to be provided with a permanent maker's plate to be arranged in an area protected against damage and in such a way that it is visible even after installation of the equipment indicating the following data:

Manufacturer and manufacturer's logo
Version designation and type
designation

Instead of a maker's plate, the required data may be engraved in the equipment.

In addition, the information on the attached expert's report and annexes of TÜV Rheinland Kraftfahrt GmbH, TÜV Rheinland Group, Cologne, of May 28, 2009 shall apply.

The model subjected to the type test has to be stored in such a way that it can be produced in perfect condition even five years after the expiry of the General Operating Licence.
